HOBBIES

Computer programing

Photography

Painting

Running/yoga

EDUCATION

BACHELOR OF SCIENCE MECHANICAL ENGINEERING FROM TEXAS TECH UNIVERSITY.

{The Science of software program; The studying of different software languages skills. the development new functional applications are a focus. Learning about programming languages studying for hours. focusing on both the front as well as the backend technologies. The increasing knowledge of modern technologies Communications are mesmerizing. The studying of complement of computers systems as well the design and analyzing and programing hardware and software. the processing of information and creating artificial intelligent.}

WORK EXPERIENCE

[JavaScript frameworks]

{JavaScript frameworks most preferable programing languages integrated as both the frontend as well as the backend cooperating with React/React/Native Vue, Node, CSS, HTML, hyper etc. JavaScript frameworks are an essential part of modern front-end web development. Building scalable interactive web app fundamental background knowledge.}

{Databases Organization}

{The Organization as well as the storing of information in the application system plays an import part in building the structure of the applications. Database's systems were used to shorten date collections depending on the storage need for the application multiple styling of databases. Relational Databases, NoSQL Databases cloud Databases are simply a few of my preferred databases.}

<React/React/Native libraries>

{React framework and libraries are amazing interfaces for building amazing responsive user interface. React performing as smooth as possible performing with excellent user Experiences. React was created by Jordan Walked for Facebook in 2011. Developers were fully introducing to these framework work features later. JavaScript skills and full understanding came to affected.}

SKILLS

<HTML/>, <CSS/>, <NPM/>, <Bootstrap/>, <Vue.js/>, <JavaScript/>, <React/>, <React Native/>, <Databases/> <relational/>, <NoSQL/> and <cloud databases/>
